*"There is a great and glorious  
purpose in the march of the  
universes through space."*

*— The Urantia Book,  
page 364, paragraph 4.*

After many years of dedicated study and contemplation of the Urantia Papers, William S. Sadler, Jr. wrote "A Study of the Master Universe" in which he develops concepts of The Urantia Book. His untimely death November 22, 1963, prevented him from seeing the fruits of his labor in print, whereby he could share his deep insight with all who might be interested. No major change was made in his original work, only minor editing.

The Appendices to which the author refers in this narrative, is published later in a separate volume.
