(II)

After many years of dedicated study and contemplation of the Urantia Papers, William S. Sadler, Jr. wrote "A Study of the Master Universe" in which he developed concepts of The Urantia Book. He also wrote 31 APPENDICES to "A Study of the Master Universe" — of which 27 were completed and are contained herein. Four were incomplete and will not be published.

His untimely death November 22, 1963, prevented him from seeing the fruits of his labor in print, whereby he could share his deep insight with all who might be interested. No major change was made in his original work, only minor editing.

"A Study of the Master Universe" to which the author refers in these APPENDICES, was published earlier in a separate volume.
