THE FOREWORD: A lecture by Wm Sadler, Jr. Explaining The Foreword of The URANTIA Book. Exact date unknown but assume it came after the 58-59 lectures possibly the early 1960s.

The list which follows is designed to help the student locate sections for further study. It is not a synopsis of content, nor the most significant statements.

- 1A -Basic overview of Foreword...his feeling for intent behind it.
-Last 2 paragraphs Pg 1 concession to human desire proceeding from man to God...but book is written from God to man. Presented in terms of causes not consequences.

SECTION 1 (Deity & Divinity):

- Deity is a word larger than God it can be other than personal.
- Deity functions are quiet (static) to active (evolutional), Deity can plan (potential). Evolution is creativity in time.
- Creative and evolutionary - The outgoing aspects of Deity.
- Supreme and Ultimate - The in-gathering consequences of evolution.
- 1/8 -Infinite and Finite concepts working together - an altogether new concept found only in The UB.
- What Supreme is to Finite, Ultimate is to "superfinite" (absonite).
- What is finite, absonite, absolute?
- Story of Jesus' Adjuster (timeless)
- 1/4 -Divinity, many different qualities, it is cement which holds all acts of Deity together.
- In 2nd half first section, the quality of divinity - permutation of 3. Perfect, relative, imperfect - then 7 associations of these aspects.

SECTIONS 2 & 3 (God & First Source and Center):

- God, the personal aspect of Deity as opposed to the ALL aspects of Deity
- Aspects of the First Source and Center (the Deity of God).
- Not told how God functions in Absolute Perfection, are told about relative divinity expression (personally, prepersonally, superpersonally)
- Personally as in creation of Sons (Jesus)
- Prepersonally as in fragments (Thought Adjusters)
- Superpersonally as in eventuation (Havona Natives)...a being whose existence is the result of a plan.
- Explanation of word eventuate.
- 1/3 -Word God has 7 meanings.
- Bestowal of Jesus is God the 7 Fold in Action
- God the Absolute would be the final expression of Deity.
- Father and Spirit are much alike, much more than just personal, among other things, can fragment.
- 1/2 -The 7 Absolutes of Infinity: Think of them as "matter-mind-spirit" reservoirs from which matter-mind-spirit are coming - Unqualified, evolving universes, Deity Absolute, spirit beings, Unqualified Absolute (mind perhaps).

Page Two

- Example: Creation of Seraphim; potential like a cloud, actual like rain
- Only one infinite being, others share his infinity. God is personality of First Source and Center.
- God is related to Universe through his associates. The other 6 Absolutes do not bestow personality (Infinite Spirit acts as Fathers agent).
- 2/3 -The I AM, concept of Deity prior to any self-distribution. This is concept not factual reality, an explanation to finite minds.
- The "IT IS" separated himself from total reality to make room. Contracte himself by will into the essence of Deity - left behind, non-Deity (non-will)...Qualified and Un-Qualified Absolutes.
- 3/4 -Universal Absolute is link between Qualified and Unqualified.
- Unqualified Absolute is obeyer of commands.
- God achieved companionship in creation of Eternal Son.
- Paradise is the absolute machine which God built.

7/8 SECTION 4 (Universe Reality):

- Points out all is not Spirit. Deified, non-deified. Actual or potential. Paradise is non-Deity.
- Paradise is a place, our destination but also has material function.

SECTION 5 (Personality Realities):

- All is associable, contactable. Body, Mind, Spirit, Soul. Personality is a 4th reality.
- Definition of Morontia. Matter and Spirit do not mix (oil and water won' mix...but in presence of soap, emulsifies).

TAPE SIDE TWO:

- 1B -Emulsification concluded.

SECTION 6 (Energy and Pattern):

Force (blue sky), Energy (clouds), Power (rain). Mind is put into matter mind is not from matter. Pattern.

SECTIONS 7,8,9,10:

- Discussion of Experiential Deity (contrasted by Existential Deity). Sevenfold, Supreme, Ultimate, Absolute.
- Sets aside Sevenfold for a moment
- 1/8 -Supreme Being. Finite Deity compensates God for lack of experience, Man for inability to know the existential. The Supreme is the Finite equiv of Paradise Trinity. Grand Universe level.
- Ultimate; as Jesus is bridge to find God, Supreme is bridge to find God
- Absolute - is experiential and existential. Our dealings with God the Absolute lie beyond completion of the Master Universe.
- 1/4 -God the Sevenfold...Deity in action in time and space. Three sections:
 - 1) Sub-absolute (Creator Sons/Spirits, Ancients of Days, Master Spirits;
 - 2) Absolutes (Father-Son-Spirit); 3) Supreme Being

1/3 SECTION 11 (Three Absolutes):

- Easy, you can read it and not understand a word of it!
- Child eats green apple, adult forecasts consequences. Jesus kept looking ahead. When any Absolute acts it is in relationship to past, present and future. One mechanizes (Unqualified Absolute), the Second activates (Qualified {now} Deity absolute), the Third unifies (Universal Absolute)
- Universal Absolute creates room to allow for imperfection...his concept is that Universal Absolute is a symbol for our inability to find the infinite.

FIRST SOURCE RELATIONSHIPS

This tape is assembled from lectures given by William S. Sadler, Jr. in 1959 at Los Angeles, California. It opens with a discussion about the First Source and Center and goes on to explain the Seven Absolutes of Infinity, other Deity Relationships, Triunities and Triodities.

Bill Sadler had the opportunity to study the Papers in manuscript form beginning in the 1930s prior to publication of the Book. He served as first President of The URANTIA Brotherhood.

Please be aware that this tape is excerpted from the lecture series. Side One is not out context within itself. Side Two starts with a continuation of Side one but adds two additional segments pertaining to the subjects presented.

The index which follows is simply a guide to help students locate the various subjects discussed on each side. Many of the subjects presented are listed here but it is far from complete. The items selected were not chosen by importance, but rather, by location.

Also note that The Lending Library has another set of tapes titled ETERNITY RELATIONSHIPS which run along the same lines as this material, but begin the story at the static moment of the I AM.

SIDE ONE:

- Inventory of 7 Absolutes of Infinity. Father-Son-Spirit-Paradise-Deity-Universal and Unqualified Absolutes.
- First Source is original Reality. Next 3 actual Reality, next 3 are potential reality.
- Explains "Personal-Prepersonal-Superpersonal"...Actual and Potential.
- The Father doesn't interfere with anything...at least on finite level.
- First Source is primal in all domains. Father is personality of FS&C
- 1/8 -First Source as a term is larger than the term Deity which is larger than term God. Father is smallest concept. We worship the Father.
- Jesus portrayed just the Father aspect.
- Quote "The Universe of Universes"
- First Source and Center is tougher concept than Unqualified Absolute.
- 1/4 -Yolk is infinite, white is infinity. Personal and not personal.
- I AM concept. Papers do not validate a monad. All Absolute Reality is from eternity.
- REFERENCE PAPER 105- Deity and Reality, pgs 1152-1161
- 1/3 -Book presents I AM first as one, then as 3 faceted, then 7 faceted:
 I AM Father of Eternal son, I AM cause of Isle of Paradise, I AM one with

SECTION 12 (The Trinities):

- When God separates things they must be reunited, resulting in Trinitization because Deity is ONE. Sets a pattern. Participants in Finite expression yield:
- First Experiential Trinity, The Trinity Ultimate (Supreme Creators plus Architects of Master Universe and the Supreme Being). A consequence of reunification in perfection of the 7 Evolutionary Superuniverses
- Second Experiential Trinity, The Trinity Absolute (God the Supreme plus God the Ultimate plus The Unrevealed Consummators of Destiny. Same idea but conducted in The Master Universe.
- Trinity of Trinities: (Paradise Trinity {Existential}, The Trinity Ultimate {finite-experiential} and The Trinity Absolute {absonite-experiential}).

1/2 QUESTIONS & ANSWERS - DISCUSSION

- Q. How can Universal Absolute be Deity?
- A. Pg 15 Par 4 Universal Absolute is Static-Potential-Associative which is the first 3 levels of Deity function... Pg 1154 par 2-separation of The Infinite One from The Infinities (Qualified from Unqualified Absolutes). JB is confused on a higher plane than before!
- Q./A. Separation of circles defined as one AND another. AND is also a reality.
- Q. Which moved?
- A. Qualified moved away from Unqualified...When Deity Absolute (qualified) commands, Unqualified Absolute takes action.
- 3/4 -Discussion of word "characterized by" - not always the case...Had Jesus Thought Adjuster not removed himself during baptism, he would have fused
- Word "extra-divine" refers to Unqualified Absolute Pg 6 par 14...a better word than un-divine; not evil, outside divinity. Pg 14 par 4
- 7/8 -Firehouse with 3 floors, bottom is finite, second floor absonite, top floor is absolute. Pole running through all 3 floors is God, contactable on all 3 levels. It's the same God, all that's changed is YOU.
- If first floor is 2", second is 1600 miles, third has no roof. If creative expansion of 2" results in God the Supreme and 1600 miles yields God the Ultimate, God the Absolute never ends.
- Computed age of Orvonton is 40,000 trillion years old.
- Tape ends

Further explanation of these same subjects is found on the tapes titled "First Source Relationships" and "Eternity Relationships" Parts 1-4.

- 1/8 -Explains tree concept again.
 - Paradise Trinity is not a triunity, not a functional unanimity (3 men or 3 intertwined branches). Trinity is undivided and indivisible Deity (trunk-corporation).
 - Deity of Father is one level, personality of Father is another level.

- Fifth Triunity...Sixth Triunity.
- Seventh Triunity.
- 3/4 -Non Triunity Associations (not including Father) = Triodities 2 examples.

- All evolution is nothing more than a transfer of reality from one Triodity to another (potential to actual). Eg a star cools down dense, atoms packed together. Electrons move in with heat-loss to atomic condensation, electronic condensation until it begins to approach the density of Paradise Absolutum but as it approaches ultimatic condensation it blows up - returns to puissant energy.

ETERNITY RELATIONSHIPS

This set of two tapes is assembled from lectures given by William S. Sadler, Jr. in 1958 and 1959 held in Pasadena and Los Angeles, Calif. It opens with a discussion of eternity events presented in a third lecture he gave on the Foreword.

Bill Sadler had the opportunity to study the Papers in manuscript form beginning in the 1930s prior to publication of the Book. He served as first President of The URANTIA Brotherhood.

Please be aware that this tape set is excerpted from the lecture series. Most of the material from both lectures is included. The beginning portion excerpted from The Foreword lecture is at lower volume than the remainder of the material.

Another 90 Minute tape titled "First Source Relationships" covers his comments on the Triunities and the Triodities is also available from the BOML Lending Library.

The index which follows is simply a guide to help students locate the material discussed on each side. Many of the subjects presented are listed here but it is far from complete. The items selected were not chosen by importance, but rather, by location.

* * * * *

TAPE 1, SIDE ONE:

- Only one infinite being, others share his infinity. God is personality of First Source and Center.
- God is related to Universe through his associates. The other 6 absolute do not bestow personality (Infinite Spirit acts as Fathers agent).
- The I AM, concept of Deity prior to any self-distribution. This is concept not factual reality, an explanation to finite minds.
- The IT IS separated himself from total reality to make room. Contracted himself by will into the essence of Deity - left behind, non-Deity (non-will)...Qualified and Un-Qualified Absolutes.
- Universal Absolute is link between Qualified and Unqualified.
- Unqualified Absolute is obeyer of commands.
- God achieved companionship in creation of Eternal Son.
- Paradise is the absolute machine which God built.
- 1/4 -STATIC function of Deity; this is before Actuals and Potentials.
- Fried egg illustration. Yolk symbolizes possibility of self will, white possibility for reaction.

- 1/3 -POTENTIAL yolk moves away from white, volitional (Qualified) moves away from unvolitional (Unqualified). The relationship (AND) between the two (one AND another). Creating a void which can be filled.
 -Papers will not validate a monad (scrambled egg).
 -Pg 1154 Eternity events described as time sequence is not a reality.
- 1/2 -Explains another thinking tool he calls the Bantu language.
 -ASSOCIATIVE level God divests himself of absolute personality...becomes Father of the Eternal Son. At the same time he builds the Absolute Machine (Paradise). The Eternal Son is the Universal Father MINUS everything which is non-Deity, extra-divine and other than spiritual.
 Son is everlasting revelation of the Father. Paradise is also a revelation of the Father. Their first act of creation...Infinite Spirit.
 -CREATIVE Reality starts with 7 Absolute Beings. Unqualified Absolute, Universal Absolute, Deity Absolute, First Source and Center, Second Source and Center, Paradise Source and Center and Third Source and Center; One functioning Universe (Central). This is the unbeginning start of the First Universe Age.
 -At the beginning of eternity sequence and time are inseparable.
- 2/3 -Explanation of the Fire House illustration.
 -Father escapes from totality of infinity - moving yolk away from egg.
- 3/4 -Undivided Deity Incorporated - The Paradise Trinity
 -Now Qualified Absolute is Deity Absolute
 -The space stage is set - the divinity stage is set.
 -Paper 10, Trinity is inevitability. As Trinity Deity still fills all
- 7/8 -Trinity formation associated with Nuclear Universe; Havona is Nucleus.
 -Superuniverses are cytoplasmic universes...definition of both terms
 -Each Trinitization makes a nucleus.
 -Pg 1145 Recap static, potential, personalization of Deity-infinite society
 -Trinitarian Monotheism.

TAPE ONE, SIDE TWO

- Deity and Non-Deity differences...back to Deity function; the egg.
 -Qualified Absolute pervaded by volition, personality, purposiveness-all expressed in prepersonalizations of Deity
 -Paradise, the absolute machine which God built to do repetitive acts.
- 1/8 -As Trinity pervades all Deity reality.
 -Recaps inventory of zero age (Paradise + 2 existential Deities-nucleus of superuniverses to be. They give expression to a Deity equal-trinitization
 -2 Master Patterns, Paradise & Eternal Son (opposites: physical-spiritual)
 -Pg 149 Paradise Cycle & space respiration cycle both 2 billion years.
 -Eternal, Eternaler, Eternalist - had the transaction taken place in time this the way it would have been.
- 1/4 -Redescribes "Bantu" for a late comer.
 -Fried egg, yellow and white...pull yolk from white-segregation of freewill from that which is not freewill...even God cannot create a square circle.
 -Universal Absolute is center circle (not concentric).
 -These frames are pancakes piled one on top of another.
 -Father-Son-Paradise, Spirit emerging from Father-Son union...activating Paradise. Disgorges space potency from the Unqualified. Paradise bestowed matter.
 -Moving on to The Three Absolutes (still Pg 13)...in other words these 3 absolutes are the creative "wells" from which potential "pumping"...the reservoirs.

- 1/2 -Three energies. Son is the Absolute of Spirit. Paradise the Absolute of energy-matter. Conjoint actor the Absolute of mind. The Triodity of Potentiality (3 absolutes) the other is the Triodity of Actuality (Son-Spirit-Paradise).
- The First Source and Center can't classify as actual or potential...is original and balances these two Triodities. This is how the Supreme and Ultimate grow.
 - This is the mass movement of the universe which involves survival...is distinguished from minor retrograde motion (from actuals back to potentials).
- 2/3 -Word infinity is used in several ways. Largest use of the term FS&C is infinity. Infinity encompasses all of these frames. Cannot be expressed in time.
- Survival decision by morontian is irrevocable choice...no amount of time will change the decision...this is an ETERNAL choice.
 - Potency of cosmic and spirit force is in progress of revelation-realization (everyone is drawing drafts on the bank account of the Universal Absolute Outpouring of new actuality (from potentiality). He calls the gray area of in-between "the zone of becoming". We are in the zone of becoming.
- 3/4 -Correlation of experiential and existential by Universal absolute. Horizontal linkage is between Unqualified & Deity Absolutes...but there a vertical linkage as well.
- By virtue of equipoising presence (like counterweight in an elevator-you know its there but don't see it. UA is the counterweight.
 - Big pressure on first floor of fire house (2") by second floor (1600 mile)
 - Pg 14 When it is impossible to tell which Deity (Qualified or Unqualified co-ordinated presence is designated the Universal Absolute.
 - Deity Absolute is living in everlasting now...eternity, is blind to time
 - Universal Father escapes all limitation (center pole in FH) conscious on all 3 levels. Deity Absolute is conscious on only one level.
 - Universal Absolute super additive to both Deity (Qualified) and Unqualified Absolutes.
- 7/8 -Unqualified Absolute...Qualified Absolute signifies Father still filling the potential of Absolute Deity. Deity Absolute signifies Father no longer filling potential alone, but as the Paradise Trinity.
- Unqualified Absolute is the second most difficult concept to understand.
 - Most difficult concept is First Source and Center (Father Facet is easy) but the whole concept-all facets is very difficult concept.
 - Unqualified Absolute is devoid of personality, divinity and creator prerogatives...hence Unqualified. We won't learn anything about him.
 - Extends on out beyond the Seven Super Universes. Is positive Universe overcontrol in infinity. Space Force unlimited, conditioned by life for personality, spirit. Further conditioned by will reactions of Trinity.
 - He's got an open end account.

TAPE TWO - SIDE ONE

- The I AM is not a reality...just a conceptual concession.
 - Not Ether hypothesis or Pantheistic (God is in everything) view of God.
- 1/8 -Universal Absolute we deduce as inevitable. Described as frame 1-2-3.
- When the Father sets up situation in time and space where energy is dominant then peoples it...its a challenge. Can you take over now? If mind is affiliated with spirit it works.
 - Universal Absolute resolves tension of personalizable and nonpersonalizable
 - To Sadler Universal Absolute is most like Conjoint Actor. Both are a bit like the Universal Father.

- Functional likeness between Paradise and Unqualified Absolute. To study UA, study Paradise.
- Deity Absolute is personalizable, deified, divine...like Eternal Son.
- 1/4 -Starting with first frame just 3 choices. Leave it alone, scramble it or separate it.
- In second frame 2 choices. Go back where they came from or set up a
- 1/3 tension resolver by adding a 3rd thing. In 4th frame 2 choices. Leave it the way it is (in which case filling all things) or step away, form a power platform upon which to take action.
- Perfection has higher specific gravity than finite level.
- Inventory of Havona.
- Havona is full expression of Gods intent on all levels and in perfection.
- 10,000,000 worlds (size of local universe) is 1% of the size of Havona.
- The tension presence of Universal Absolute signifies adjustment of differential between Deity Reality and undeified reality inherent in separation of the dynamics of free will divinity in contrast to the static of unqualified infinity.
- Potential infinity is absolute and inseparable from eternity. At any moment in time there is a future. If a future there is growth. If growth, you can't express everything now.
- The differential of infinity potential that eternalizes Universal Absolute makes it possible to have material universes in space and finite personalities in time. We will not be crushed by higher specific gravity of perfection...due to the tension resolving nature of the Universal Absolute
- Uses example of quicksilver displacing water due to higher specific gravity
- 1/2 -Each Deity is utterly dissimilar, unique relationship not carbon copies. Nothing escapes relationship to Universal Father - in function, 3rd Source and Center. Material reality has no relationship to Eternal Son-Spiritual Reality none to Paradise. But 1st and 3rd Sources cut across gamut of reality.
- All reality has a relationship to the Universal Absolute.
- 7th Triunity is Universal Father, Conjoint Actor and Universal Absolute. This is functional master linkage of everything. HEAVY-STUDY.
- 2/3 -In Washington a population meter shows births-deaths, net total. Imagine the Universal Absolute Meter.
- Foreword definition is about the Universal Absolute alone...an emptiness
- 3/4 in which action can take place. Static-dynamic Deity (relationship between Deity and Unqualified Absolutes). Experiential-Existential Deity (God the Absolute which would represent the experientialization of the Existential Deity Absolute).
- A Thought Adjuster is an eternity reality.
- 7/8 -Pg 4...The First Source and Center. This is only discussion of FSC as such
- Inventory of 7 Absolutes of Infinity. Father-Son-Spirit-Paradise-Deity-Universal and Unqualified Absolutes.
- First Source is original Reality. Next 3 actual Reality, next 3 are potential reality.
- Explains "Personal-Prepersonal-Superpersonal"...Actual and Potential.
- The Father doesn't interfere with anything...at least on finite level.
- First Source is primal in all domains. Father is personality of FS&C
- First Source as a term is larger than the term Deity or term God.

TAPE TWO SIDE TWO:

- Father is smallest concept. We worship the Father.
- Jesus portrayed just the Father aspect.

spheres standing at right angles to each facet of cube. 7th sphere is
inside cube. Subject changes.
-Collectively all 7 Absolutes equvalate to infinity.
-Quotes: for all 7...Paradise Source and Center (I AM force).

JOURNEY TO PARADISE

This tape is excerpted from a series of lectures given by William S. Sadler, Jr. in 1958 at Pasadena, California.

Bill Sadler had the opportunity to study the Papers in manuscript form beginning in the 1930s prior to publication of the Book. He served as first President of The URANTIA Brotherhood.

This account is his view of how we ascend in stages from mortal death to Paradise - A consolidation of knowledge derived from The URANTIA Book, (C) 1955, URANTIA Foundation, Chicago, Illinois - USA.

- Speculation of approval to travel to other worlds...getting to #612.
- 7/8 -Constellation (100 Systems).
- Teaching us ethics, manners Univitatia (not Morontia Beings).
- Will get to try our long cherished desires (EG Celestial Artisan).

SIDE TWO:

- Career choices continued.
- Graduating from Edentia - from morontial to spirit levels.
- 1/4 -Graduating from Minor Sector of Ensa then to Major Sector of Splandon.
- 1/3 The move is lateral to the next Major Sector...all 10 Sectors traversed.

- 1/2 -Next step is to Uversa, meet Havona Servitals there.
-Suggests thesis on the various Creator Sons choosing which of their offspring they choose to indwell.
- 2/3 -Arriving on the shores of Havona.
-Ends moving into 6th circuit.
-Introduced to Master Spirit #7 then on 6th circuit of Havona.
- 3/4 -Fifth circuit, attempt to find Deity on Paradise; 4th is Circuit of Son (Creator Sons activity but find Eternal Son).
-Great adventure leaves 2 circuits to tune-up.
- 7/8 -Paradise worship exceeds greatest pleasure we have ever known.
-Stand in receiving circle in Corps of Finality. Senior Architect administers Trinity Oath of Eternity-Finality is now face to face with the challenge of the Ultimate.

SPACE-ENERGY-MATTER

This set of 2 tapes (4 parts) is assembled primarily from lectures given by William S. Sadler, Jr. in 1958 and 1959 in Pasadena and Los Angeles respectively. The set opens with an explanation of his illustration of "The Fire House" - to which reference is made throughout the material presented. A small portion of the fire house story comes from an altogether different lecture in which he explains the Foreword of The URANTIA Book.

Please be aware that this material is taken out of context in terms of the full lecture series...but it does fairly well cover the full extent of the material he presented concerning these subjects in the lecture series.

Bill Sadler had the opportunity to study the Papers in manuscript form beginning in the 1930s prior to publication of the Book. He served as first President of The URANTIA Brotherhood.

Further study of these concepts are to be found in Sadlers' books "A Study of the Master Universe" and "Appendices to A Study of the Master Universe", the later of which includes 27 of 31 Appendices. His untimely death November 22, 1963 prevented him from seeing the fruits of his labor in print. Four of the "chapters" were incomplete and will never be published.

The index which follows is simply a guide to help the student locate the various subjects discussed on each tape. Many of the subjects presented are listed here but it is far from complete. The items selected were not chosen by importance, but rather, by location.

* * * * *

SPACE-ENERGY-MATTER - PART I

- Illustration of the FIRE HOUSE. Three stories. God is the centerpole.
- It has 3 floors, bottom floor is finite level, second floor is absorb level and the top floor is the absolute level.
- A timeless being has no time consciousness. EG Jesus' Thought Adjuster is example of third floor.
- Transcendental (Absonite) level, EG Architect of Master Universe or Force Organizers, are on the second floor.
- As Finaliters we go out into superuniverses and return, but are higher up.
- Total Deity on finite level...we want to see Mr. Trinity (God the Supreme)
- The ceiling of the first floor is the Superuniverse Age of Light & Life.

- Reiterating from a different tape with another viewpoint. If the first floor (finite) is 2", second is 1600 miles, third has no roof. If creati expansion of 2" results in God the Supreme and 1600 miles yields God the Ultimate, then God the Absolute never ends...no roof on the fire house.
- 1/8 -How big is Paradise? No distance.non spatial. But proportions stand up
 - Distance is function of space like pound is function of gravity.
 - Ellipse is pattern of Universe.
- 1/4 -Author of Paper 1 Divine Counselor. Colleague (Perfector of Wisdom) discusses Nether Paradise.
 - He thinks of Paradise as a material heart pumping energy.
- 1/3 -Space is not nothing-midspace retards motion.
 - Universe is mostly space - matter in space and space in matter.
 - Water as ice expands. Water is a space trapper. Add salt, contracts. When water takes something into solution it gives up space.
 - Space is a positive reality in the Universe which acts on gravity to cau it to diminish as square of distance traversed!
 - Space has a property conducive to motion. Midspace is resistant to motio
- 1/2 -Discussion of moving into midspace...increasing resistance to motion.
 - Time is something we deduce. Relationships to time do not exist without motion is space. Consciousness of time does. Only truly non-temporal place is Paradise area. He can't visualize it.
 - Fourth Triunity (reactive infinity). Energy potential of COSMOS-INFINIT "of which the grand universe and the master universe are only partial manifestations" (!) There it is...cold turkey!
 - Paradise is the heartbeat that pulsates.
 - Page 469 ENERGY MIND AND MATTER Sec 2. Starts with conversion of potent ials into actuals. Ends with a discussion of actuals existing fm eterni
- 2/3 -Starting with space potency...came from Paradise and passes into control of the Unqualified Absolute. Paradise is Pitcher; Unqualified is Catche baseball is uncreated stuff of the unbegun universes of the eternal futu Unraveling the baseball.
 - Space potency (absoluta-neuter form of masculine absolutum). Read to Universe Power - visualize crystallization of water vapor. First fog, th clouds, then rain, then freeze to ice.
 - Primordial force is still water vapor. Emerges from space potency just because force organizers go out there (function of 4th Triunity).
- 3/4 Divides in 2 phases. Segregata. Emergent Energy (fog)-2 levels Puissan (powerful) and gravity energy.
 - Paradise gravity reaches out in a tenuous way.
 - This starts story of Andronover Nebula. Pg 651...now it's beginning to rain...ULTIMATE emerging energy of God the Ultimate...2nd Floor of Fire House.
- 7/8 -Segregata is of Third Source and Center-God of Action. Absoluta is 3rd Floor of Firehouse.
 - Ultimata is down on the 2nd Floor.
 - Gravita - 1st Floor of Firehouse, domain of the SUPREME - ice. This is the end of the story...the things we know from our physical sciences her
 - Triata is Havona energy...but nothing to do with space potency.
 - Absoluta became less and less absolute as it came down...more and more absolute as it goes back.
 - Our physical energy (gravita) atoms have 2 charges, positive and negativ Havona atoms have 3 charges (+,- and undiscussed.) Havona energy is the domain of the 3rd Source & Center.
 - Tranosta...Transcendental Energy (2nd Floor). Manifest on Havona.
 - Monota is the energy of Paradise itself (back to the 3rd floor...Absolut

SPACE-ENERGY-MATTER - PART II

- Ampmeter-Voltmeter for comparison. Get a reading off Eternal Son...same exact reading from Paradise.
- Pg 638 Universal Unity. "Pure energy is ancestor...pure-spirit..."
- Spirit nature of a Thought Adjuster. A fragment of something which, when expressed is Paradise Monota.
- The Triodities represent a valuable concept because they symbolize all growth. If it isn't here it involves Triodity of potentiality; if it is, it's the Triodity of Actuality.
- All evolution is nothing more than a transfer of reality from one Triodity to another (potential to actual). Eg a star cools down dense, atoms packed together. Electrons move in with heat-loss to atomic condensation, electronic condensation until it begins to approach the density of Paradise Absolutum but as it approaches ultimatic condensation it blows up - returns to puissant energy.
- Matter recycles but personality can become extinguished.
- First Source and Center is Primal in all domains...understand it better.
- Back to Foreword Pg 5 restated substituting a few words.
- FCC retired from direct contact with things except if field of personnel.
- 1/8 -On to Paper 10. Pg 111 discusses function of FCC outside Havona.
"Through Creator Sons, his grandsons"...etc. (as a creator) as a controller as spirit, as mind, as a father, as a person, as total Deity. Here we are dealing with actualities. Absolutes don't come into this listing at all.
- 1/4 -Second level cannot function in infinity...eternally growing function.
-Illustrates this story by deriving a new planet and achieving destiny. This illustration is in Orvonton, not in outer space.
-Up until the time the power centers in Orvonton take over the story is the same in the outer space levels.
- Speculates First outer space level will be fully settled astronomically before habitation. Thinks 4 outer space levels are quite similar.
- 1/3 -Superuniverse Space Level (SSL) First Floor of Fire House. OSL is the 2nd floor. Havona is all 3 floors. Paradise is theoretical roof as well as the foundation of the Fire House.
- Speculative story...Papers encourage us to speculate. He thinks 3rd Source and Center pries loose from the Unqualified Absolute his grasp on space potency. As infinite manipulator or even via Paradise Trinity...
- Papers say God of Action is ancestor of motion in space. Makes action known through Architects of Master Universe.
- This space potency came from Paradise (Unqualified is custodian of absoluta) then turned to segregata. Once Associate FOs have segregata they turn it into emergent energy.
- 1/2 -These transcendental Master Force Organizers operate in the domain of God the Ultimate. Orvonton government knows nothing of this.
- Council of Equilibrium on Uversa made up of associate transcendental Force Organizers...they patrol Orvonton looking for work of Primary FOs.
- 2/3 -Guessing Orvonton 50,000 trillion years old. After discovery 87 billion years later issued a permit to build. (The basic nature of all motion is counterclockwise).
- Puissant energy controlled by their senior partners (Master FOs is converted to gravity energy (ultimata-the ultimatic stage) basic mass begins to appear. Paradise gravity doesn't act on pre-mass.
- 3/4 -Speculates that a Superuniverse and an Outer space level evolve in same manner to this point. Then it changes. Associate FAs elaborate on matter to electronic stage. We recognize matter at the point beginning at the 100 ultimaton cluster of the electron.

- Master Force Organizers work 25 billion years transmuting pussies energy to gravity energy. Then turned over to the Power Directors (of Orvonton
- Power Directors & Power Centers elaborate gravita (universe power) out o gravity energy (most mature form of emergent energy (ultimata).
- 3/4 -Gravity response of ultimaton is to the circular gravity of Paradise. I differs from linear gravity 2 ways; circular + not diminished by square distance traversed. It acts on ultimaton anywhere with equal force.
- Macro (bigger) Cosmos, Cosmos, Micro Cosmos (atomic)...there are 3 gravities, Paradise governs Macro. Cosmos governed by linear gravity.
- 7/8 -Think of our solar system as a cosmic atom. Whole space level arrangeme is a Macrocosmic atom.
- Heavy elements-outer electrons are unstable and fly off. Solar systems work the same way.
- Explanation of gravity. He gives a physics lesson here.
- Andronover nebula...new linear gravity appears. Changes equilibrium (a new pull. Diminishes through distance. Pg 652 By the time the Orvonto Power Directors had been at work 100 billion years....
- Linear gravity is a property of mass at the atomic and electronic level.

SPACE-ENERGY-MATTER - PART III

- Linear gravity appears and provides a cohesive force.
- More ultimata are huddling. This is the beginning of great struggle of linear gravity (in pulling) and centrifugal (outgoing) motion of heat-motion. Heat is a measurement of motion and motion a measurement of hea They are essentially the same thing.
- Solid matter atoms locked in cellular formation. As liquid they slide. gaseous form they bounce around.
- Two things happening: Every time 100 ultimatoms aggregate a bit of linea gravity is born. More mass, more gravity. Nucleus weight effects distance and speed of electrons.
- 1/8 -If our sun increased in mass, its gravity would be greater. Earth would move closer in toward our sun.
- Water vapor, clouds, rain, ice. Changes as in energy to mass. Elaborat
- 1/4 on these examples. Heat is stored energy. No difference between rottin
- 1/3 rusting, burning or exploding...just a matter of time...all is oxidation
- Matter...landing on an asteroid: you would stick. Would splatter on Jupiter. On a planet with twice the gravity is peopled with 75 pounders
- 1/2 -Conversation diverted to size of ancient peoples - Adam etc.
- Two contending forces, each of which is growing. Mass is born, gravity, spins faster - a force opposite of gravity is fighting this. Equilibriu Our sun is trying to pull us in and we are trying to spin off.
- 2/3 -600 billion years ago Power Directors had been working 200 billion years Andronover reached maximum of mass (pg 652) Began spiral phenomena. The cooling (slowing down) continues to read from pg 652 to end of tape.
- 3/4 -Andronover nebula...quotation from Book.
- 7/8 -Construction of Salvington, same material as Earth but maybe less heavy elements to reduce gravity. Other architectural worlds...built by hand.
- Power Directors can "set atoms" like a printer "sets type".
- Architectural worlds are strictly physical spheres.

SPACE-ENERGY-MATTER - PART IV

- Added morontia patina to surface of the architectural worlds.
- Reading: Michael arrived 400 Billion years ago. 300 Billion years ago t Andronover solar circuits approached physical stability.
- Michael first functioned as a physical builder. Creative Spirit-power ac
- 1/8 ed strictly as a super power center. More quotation from Book.

- Physical design changes approved by Infinite Spirit.
- Creature designs approved ultimately by the Paradise Trinity.
- 1/4 -Pg 357 Local Universes approximately same charge. Sum of energy+mass.
- 1/3 identical in all local universes 1/100,000 part of Superuniverse.
- Architectural worlds began.
- Creator Sons preceded by Power Directors and Energy Controllers. Pg 321
- Same Power Centers stay on for administration of energy mobilization.
- 1/2 -On each Constellation there are 10 Power Centers. On each System 1 PC.
- Back to Pg 358 Salvington situated at center of energy-mass of Nebadon.
- 300 Billion years ago Michael's personal staff arrived - Tertiaphim...they
- 2/3 serve until arrival of Gabriel...see Pg 654. Relative space appeared.
- Between 300 & 200 billion years ago Seraphic, Melchizadeks etc were create
- 3/4 -Explanation, questions, reiteration. Comparing living universe to human
- body...but if we knew the body of a Power Center we would understand it
- better.
- 7/8 -Goes back to center of things to explain further. Local univ designed by
- pattern. World Orvonton is General Office for Superuniverse of Orvonton.
- Secondary career of space nebula when visible to astronomers as a nebula.
- What is fate of Andronover? Will heat win, will motion win or will it
- collapse in gravity...tune in (like a soap opera)!

Audio Tape Index to the William S. Sadler, Jr. Lectures of 1958

These lectures by William S. Sadler, Jr. were taped at Pasadena, California in 1958. The meeting took place for the benefit of the newly organized First URANTIA Society of Los Angeles (FUSLA). Having been planned a year in advance, this event was attended by some of the original Chicago Forum.

William S. Sadler Jr. (Bill) was the son of Dr. Sadler and had an early grasp of the teachings due to study of the original manuscript. He helped organize The URANTIA Brotherhood and served as its first President.

If study of this material is of interest, the BROTHERHOOD OF MAN Lending Library has both the Sadler, Jr. books. "A Study of The Master Universe" and "Appendices to A Study of The Master Universe" not only clarify some of the most difficult concepts of The URANTIA Book, but speculate from its teachings to the distant future beyond its specific revelation. Sadler, Jr. was gifted with an extraordinary mind which clearly understood the teachings.

The purpose of this index is to assist serious students of the Pape learn from this early movement pioneer. Most of the material is quite remarkable. Extensive as it is, locating the various subjects for later review is difficult to do without a road map.

Each of the eleven 90 minute tapes is numbered. The fraction marking to the left indicates the approximate location of subjects discussed. This index is in no way a complete statement in itself. It does not necessarily cover the most significant statements - it's merely a guide to location.

TAPE 1

- 1A -Mammalian creature - God superimposes indwelling Adjuster. Who are lowest are host to Adjuster - higher beings are not Adjuster indwelt.
- 1/8 -Discussion Qualified, Unqualified Absolutes...Fried Egg-yolk qualified, the white represents the unqualified.
-Tiglath is subpersonal?
-Personality as such is pure quality...like the Abstract color yellow...no such thing, need a yellow something. Personality needs life vehicle
- 1/4 -Think of a rope with a loop in it. Our mind circuit is the loop, when person dies, rope is pulled straight. Individualized portion is gone.

Page 2 - Tape 1 Side A, Continued

- 1/3 -Discussion of morontia body. We will wake up with a similar body.
- 1/2 -Activating memory. Soul, Adjuster & Personality. Soul has 2 kinds of memory...tapes of mind have been partially retaped on soul level, less on Adjuster level. Perhaps morality tapes in Soul level, not on Adjuster level. Seraphim can tell you a lot of stories too.
- Inventory of our deficiencies. Character momentum (karma). Your unfinished business goes on.
- Pre-experienced Adjusters. They volunteer.
- Compare human being to necklace of beads-beads change, the strand doesn't. Personality is specific, never changes.
- 3/4 -Primitive Man only thought when hungry; man is lazy, only think when hurt. Hungry cave man, each movement is poetry in motion.
- 2/3 -Fifth mansion big changes, universe minded, working to learn. The Will to service.

-Cumulative effect of "lazy" choices.
-At age 17, he was agnostic in service, argument between
Catholic and Atheist friends stimulated his interest.

came upon name "Great Source & Center" (before reading UB).

in your presence, look up and no one there...maybe there is.
-Many make the 3rd Circle.

friend.

-Each Trinitization makes a nucleus.
1/8 -Recap static, potential, personalization of Deity-infinite
society.

effort.

ness. All expressed in prepersonalizations of Deity.

acts (for same reason men build machines).

- 2 Master Patterns, Paradise & Eternal Son (opposites: one physical, the other spiritual).
- The terms Eternal, Eternaler, Eternalist.
- 7/8 -Foreword discusses just 5 topics.....
- 3 forms of reality - material, mindal, spiritual.
- Hinduism, one form of energy; UB presents 3 forms with interassociation.
- Personality, Space are words which have quite different meaning than used in English language...others too.
- Can conceptualize the word Personality in the abstract; must be associated with living energy system.
- 3B -Personality continued...
- Subtile relationships...spiritual beings can be other than personal.
- Minded beings are not necessarily spiritual.
- TA is spiritual entity but not personal until fused or personalized.
- First Source and Center is not Father to TA...example of no way to express the proper terminology in English.
- 1/8 -EG word eventuate problem is time reality and eternity reality
- 1/4 -The Bantu language problem...can wind up with description very different from the reality of it.

- 3/4 -Universal Father is not Absolute Personality, Son is...this makes God the Father of all persons.
- Paper 7, Son is Revelation of the Father. All personalities are sons.
- Every action has equal and opposite reaction...Paradise is the revelation of non-deity, Son is full revelation of the Father.
- Discussion of Universe Ages...Zero Age, First Age, Second (present) Age begins with creation of 21 Ancients of Days.
- Zero age; Father & Son alone on Paradise...act of trinitization Infinite Spirit, Havona worlds beginning of Havona Age.
- 7/8 -Universe ages continue...
- Created beings, Evolutionary Beings. Evolution is the new thin in the 2nd Universe age (elsewhere described-evolution is simpl creativity in time).

TAPE 4

- 4A -Our universe age started with Ancients of Days, ends with settling in Light & Life. Supreme Being emerges.
- Last 2 Adjutant Mind Spirits (wisdom and worship) a concern of Supreme.
- AS we use mind there is a repercussion in Local Universe Mother Spirit on to the Supreme Being.
- Everything funnels into Supreme.
- In our thinking time = experience, experience = evolutionary growth...it isn't.

- Arriving on the shores of Havona.
- Ends moving into 6th circuit.

TAPE 5

- 5A -Journey to Paradise continued.
 -Introduced to Master Spirit #7 then on 6th circuit of Havona.

 -In creative expression of Havona realities which are less than absolute.
- 1/4 -Did transcendental level (absonite) level precede or follow finite? Papers dodge it "pre-echo" - in planning sense before, evolutionary, after.
 -God the Sevenfold - Pg 11
 -Two kinds of Creator Sons--Creator Sons and Master Sons (maybe more).
 -Power Directors are 2nd view of God the Sevenfold-mind dominance of matter.
- 1/3 -Study Council of Equilibrium Pg 651, then Pg 324 Master Physical Controllers...Council of Equilibrium. Frandalanks.

 -Mission of Finalizers is to do for Outerspacers what Paradise/Havona descenders (and others) do for us.
 -Nucleus discussions.
 -Post Supreme Ages are a new aspect of collaboration - "That which began as Father-Son and became Son-Spirit will evolve into Spirit-Supreme & beyond."
- 2/3 -New relationships 700,000 Creative Trios (Creator Son/Creative Spirit + trinitizations thereof. Will be a touch of humanity here.

- 3/4 -Recap of markers beginning and ending various ages.
 -Completion of Seven Corps of Finality are commissioned to begin invasion of outer space. May be associated with evolution of Supreme Being.

- Oldest worlds in Nebadon are 200 Billion years old. Getting Paradise can be done in that time, maybe less. How long would you like to spend exploring Europe (100 years?) one billion worlds in Havona...how long do you want to explore each one? Look at side trip Calagastia's boys took.
- 7/8 -Guessing 1/3 of subjects to learn are required, 2/3 elective. nothing like going to school down here. Learn it-Teach it.
- Explore what we may find in Outer Space...Grand Universe is going to change...stationery citizens may not remain that way other possibilities.
- What happens in outer space...2 Trinities acting, Supreme Bei functioning, 7 Master Spirits still at it.
- 5B -Several types of Creator Sons in outer space...we'll be out there helping compensate spacers for lack of evolutionary experience. Absonite growth will begin.
- Doesn't think we can compute what absonite will be like.
- Refs 235 p4 more than 700,000 Creator Sons...Pg 1299 p5 one million.
- 700,000 Unions of Days each functioning with Creative Sons. Each Local universe embraces 100,000th of power charge of a Superuniverse. Creator Sons are not of fixed numbers.
- Outer space Master Michael's (ours)+Creator Sons who first function there. Maybe 2 kinds of those: 1)One now in existen not functioning, 2) One born in next age to function then.
- 1/8 -How big is 1st Outer Space level-70 aggregations of matter larger than Super Universe suggests 10,000 Creator sons to ea aggregation.
- If Creator Son/Daughter trinitize one type, new ones may trinitize another type.
- Maybe Seraphim will not be created for outer space...we look the way it is now rather than how different it will be after this age.
- Creative Spirits-differences.
- Will God the Sevenfold become God the Tenfold?
- 1/4 -Parallel; Universal non-spiritual energy systems - absoluta, segregata, ultimata, gravita, swings back toward the absolute triata, tranosta, monota.
- Paradise material energy and spiritual energy are indistinguishable except by name!
- Same swing in 7 levels of total deity function.
- 10 times number of Architects.
- 1/2 -Pg 360 radius of Orvonton 250,000 light years Urantia-Uversa. Transverse diameter of donut (superuniverses) is now 1". Igno the hole (Havona).
- Volume for 1 billion worlds but 7 Supers have 7,000 billion inhabited worlds, architectural spheres+(500,000 billion in supers)+suns, dark bodies etc...Havona is tiny. Pg 182 gives Grand Universe numb of Urantia = 5 Billion...physical sphere registry number so large...
- He figures Central Creation 1/100th of 1% of total volume of Grand Univ or 1 cent to \$100. Such a small percentage can be ignored.
- First Age = Father/Son, Second Age = Son/Spirit, Third Age =
- How did Infinite Spirit attain personality (creation of Havon

Page 8 - Tape 5, Side B, Continued

- 2/3 -Zero period of Nebadon...4th circuit Havona circuit of sons (Pg 293)--Pg 250 - what Michael's are doing? Infinite Spirit repercusses Creative Spirits (2nd stage). Go down 6 stages of Creative Spirit, becomes more personal-Creative Spirit and Infinite Spirit become real in the same way, one in a single act, the other, in time. By the completion of a creative act. Our Divine Minister 5th stage, Nebadon settled in L&L = 6th stage 7th is UNREVEALED.
- Son & Spirit collaborating in this age (evolutionary cauldrons) even Local Universe Rulers evolve.
- 3/4 -Two courses of evolution operating at right angles...Creator So no evolution of personality-descending. His composite nature runs Universal Father to Carpenter. Has worked his way DOWN! She knows from impersonal to true personality - between them they have all possible combinations. Michael vertical, Creative Spirit, lateral - right angles.
- 7/8 -Objective of Son-Spirit collaboration is to duplicate what Father-Son on Havona did, but in time.
- Creator Son is more than finite, probably has ability to do more.
- When Nebadon, Orvonton, 7 Supers settled in L & L, puts Creative Duo out of work...administration only required. Then Trinity Ambassador (Union of Days), Gabriel and, Father Melchizedek (Gabriel's associate) will manage.

TAPE 6

- 6A -Next, 3rd Universe age, First Outer Space level, perhaps no Creator Sons (Spirits) in Local Universes - will be run by Union of Days, Bright & Morning Star & Father Melchizedek
- Creators being in outer space. They have raised their family!
- Pg 241-242 discuss future of Master Michael's - absonite level of service.
- Pg 643 Michael's destined to function in outer space levels.
- Associate creator identity - perfected superuniverses a part of career of the outer spacers. Master Spirits concerned then with outer space.
- 1/8 -End of present Universe Age. Father & Supreme Relationships: Father concerned with EACH, Supreme, with ALL.
- We able to portray Supreme.
- Will be able to travel between Superuniverses - Grand Universe far different then, finite destiny achieved.
- Having attained Supreme, Ultimate will be new adventure.
- 1/4 -First experiential trinity at close of present universe age.
- Is 1) Supreme Being, 2)Supreme Creators, 3)Architects of Master Universe.
- 1/3 -Architects are living blueprints-superpersonal, 3 on Havona level, 7 on Superuniverse level, 70 on First outer space level.
- Gets into gravity of Paradise Pg 132; 15% Mind gravity is unaccounted for unless it's already operating in outer space - all Spirit Gravity here now.
- 1/2 -Gets into numbers-Mendellian Ratio which runs throughout the Papers.
- Worlds of Father contain potential of whole Master Universe - Pg 208.
- Number 10 equates to Supreme Being, Number 7 before.
- Square figures for Outer Space levels - Post Supreme Ages: 70x3x10.

- Completion of Havona yielded a Trinity, Grand Universe another Space Levels the 2nd Experiential Trinity.
 - First-second-nucleus; can deal with organic (not mechanistic) comparison.
 - The universes "they grow them".
 - 2/3 -The max is Trinitizing God the Absolute-experientialize God Absolute out of Deity Absolute-probably attempted but never fully attained.
 - Example two experiential brothers carrying battering ram, wall is absolute.
 - His speculative thinking is a string upon which he strings the beads of understanding.
 - 3/4 -Pg 1226 next to last par...our personality has potential of 7 dimensions of self expression: 3 on finite level, 3 absonite, absolute level-the last allows sub-infinite penetration of the God The Absolute.
 - Havona is sub-infinite portrayal of God's concept of a perfect universe.
 - Just as Jesus portrays divine path to God, Supreme Being is pathway to absonite adventure - the attempt to find God as Absolute.
 - Concept of success (10 yr old, 20-30-50 year old's - billion year old's).
 - 2 kinds of dark bodies 1) bodies surrounding Havona (linear & circular gravity) 2) Pg 173 dark islands.
 - 7/8 -70,000 aggregations in 1st outer space level, each of which bigger than a superuniverse, in 2nd outer level statement far greater activity!
 - No data dimensions of 2nd-3rd-4th outer space levels. Works proportions to arrive at them.
 - Proportions of Master Universe, calculated by Wm. S. Sadler, J
- | | |
|-------------|---|
| 1" | Paradise to outer edge of Orvonton (radius) |
| 100" | Paradise to end of 1st Outer Space Level |
| 10,000" | Paradise to end 2nd Outer Space Level |
| 1,000,000" | Paradise to end of 3rd Outer Space Level |
| 10,000,000" | Paradise to end of 4th Outer Space Level |
- 6B. -Thinking in terms of objects we know and understand:
 - TENNIS BALL (2") = Grand Universe + Havona
 - SMALL BEDROOM (8x8x8') = 1st Outer Space Level
 - CITY BLOCK (800x800x800') = 2nd Outer Space Level
 - CITY OF CHICAGO (16x16x16 Miles) = 3rd Outer Space Level
 - THE MOON (but 1/3 again its size- 3200 mi dia.) = 4th Outer Space Level
 - Not really spheres but more like large donuts.
 - Transit speeds: Seraphim 3x velocity of light...500,000 light years across Orvonton, Solitary Messenger, Gravity Messenger is fastest.
 - TA Divinington to Urantia - Independent of time. Much like Gravity Messengers-which are fragments of the Father! Pg 346 An order of Personalized Adjuster.
 - 1/8 -We will go right on through following the Michael's
 - Universal Absolute Unity, firehouse, unending adventure...we approach comprehension of God in Havona with Pint Sized capacity, then again with Quart, Gallon...unending...unqualified reality.
 - Note: Great quotes...find them in Book

- 1/4 - "This complicated book is the simplest religion ever presented to man". The boss man is your father and wants you, and if you want him, who can keep you apart!
 -Interesting thought. We will be the living ladder upon which the outer spacers will climb (to Havona - in the same sense that the Havona Descenders are our ladder to Havona).
- 1/3 -At heart of each adventure we keep finding the same God...first truth and the last fact.
 -Outer space levels don't differ from each other radically.
 -Tone of outer space levels is Spirit Supreme, here, Son-Spirit; Havona, Father-Son.
 -Trinity Ultimate (2nd experiential trinity).
 -Why 4 outer space levels-(not 3-7-10?)...Now 6 (Havona, Supers, +4 OS levels) + Paradise =7 Pg 333.
 -What does 7 mean - 7×10 combinations--exponential expansion--1st-2nd-3rd-4th powers of 7.
 -Exponential expanding march through destiny.
 -Pg352 p3: Attempted eventuation of one more Master Architects.
 -Aside: "Translating common stock into Bantu".
 -Discussion of Experiential Trinities.
- 2/3 -7th level, Total Deity Function (Pg 2, God the Ultimate)...
 A Tennis ball to produce Supreme Being, the Moon to produce the God The Ultimate.
 -This is difference between Absonite & Finite - 2" vs 3200 miles
 -99.99% of UB is story of Tennis Ball-there is just enough information on future ages to speculate with.
 -7 Super Universes completion in a "twinkling of an eye" vs Outer Space Levels.
- 3/4 -Progression in Divinity cooperation-good quotes, Trinities - last Paragraph of Page 2.
- 7/8 -Reference Sec 11 Master Universe...as Final Nucleus, 3rd & final nucleus? Will it take Trinity of Trinities to administer the cytoplasm beyond the Cosmos Infinite (Pg 1168 p3).
 -Pg 130 p3 Space not infinite...
 -IF THESE THOUGHTS CORRECT there is a 7th Universe Age. Experiential-Eternal age. Started with Existential Eternal Age Has origin but no end.
 -Ways of looking at it...What is Paradise gravity...time-eternity concepts.
 -Our paths are bound to cross in eternity.

TAPE 7

- 7A -Where do we enter into the picture? Subinfinite penetration of Absolute?
 Pg 1226 par 14 - Human personality has 7 dimensions.
 -Orange Juice analogy...Infinite in quality, not quantity. Like Havona, not limited by quality, but by quantity - Gods concept of perfection.
 -He lives with feeling of "Flavor for God". Letter to his Mother.
- 1/8 -Reserve Corps-human qualifications midwayer protects investment Midwayer Adjuster action, assigned to one of the 12 departments of Urantia govt, Pg 1255 explains groups.
 -Transfer of info from one Adjuster to another on near death of Reservist.
 -Used in last ditch effort (Reserve) if you use it, it's not in reserve.

- 1/4 -Insurance policies not bank accounts. Einstein a bank account
Lincoln maybe a reservist...speculation rehearsed for 2 things
-Recap his questions: 1) Positional value of Universe ages,
2) Space variable or constant, 3) Quality & Quantity, 4) Function
of 2nd Experiential Trinity...now up to #4.
- 1/3 -Discussion 2nd Experiential Trinity. Now dealing with absolute
... potential for more universes, can't exhaust the
inexhaustible. Pg 16 p 6 Back to pg 2, examine list...ends with
Ultimate, stopped short - where is Absolute? Can't unify it
experientially.
- 1/2 -Question 5) Growth of God the Absolute. Trinitizing parents
established the principle. Personality, TA is creative -
mobilizing potential. Water vapor illustration. Trinitizing
parents produce only 1 being their equal.
-Same principle applies to Supreme and Ultimate...not complete
they grow.
-Possibilities to consider 1) Grows in Cosmos Infinite, 2) Grow
in Trinity of Trinities, 3) Final power personality synthesis.
Infinite Spirit is max amount of synthesis on existential level
Final victory of spirit over matter.
- 2/3 -Same synthesis taking place in Infinite. Back to yolk in egg.
-Question 6) Roll of Universal Absolute in the Final Age. Pg 1
par 9 says Universal Absolute not attainable by creatures...
grows to fast. Universal Censor doubts what he heard on another
superuniverse. Maybe we partially attain Deity Absolute but not
Universal Absolute.
- 3/4 -Only infinity can disclose the Father Infinite.
-Question 7) What is the final goal? His thinking it appears
be experiential unification of 3 Absolutes...but it's non-
attainable...we still pursue the goal.
-Last 2 paragraphs on page 2 describe the Fire House.
-God the Sevenfold is not a person, is an association. Trinitizing

circles.
- 7/8 -Divinity is like stickum on adhesive tape - it sticks together

- Atonement concept is blasphemous.
- His child's book about the Bible...what if the angel was late? He had no part of it. Thinking people cannot buy a God who is angry at men.

- Pg 194 inventory of 7 functions of human mind. Personality in action in the human mind.

- 7/8 -Deity & Reality Pg 1152-1157...sequence relationships.
- Static Deity (fried egg) always possibility of self-will...3 realities White-Yolk-Relationship between white and yolk. Yolk qualified itself. Derivation of word unqualified. Universal Absolute is the relationship.
- Unqualified Absolute is static reality minus deity. Qualified contains seeds of deity manifestation.
