The Urantia Book is a unique publication of epochal significance to the mortals of this world, Urantia. It is the most important proclamation since the earth life of Jesus. The Urantia Book, of 2097 pages, is a comprehensive organized presentation of 196 papers by many authors.

- Part I. The Central and Superuniverses.
- Part 2. The Local Universe.
- Part 3. The History of Urantia. (Our world.)
- Part 4. The Life and Teachings of Jesus.

This book discloses the divine purpose in the mind of God; the orderly creation, the administration, the vast scope and future of the Grand Universe, including our world, Urantia; the origin, evolution and history of our planet; of life, of man, of civilizations, human institutions, governments and religions.

It contains over three times as much as the Bible of the actual life and teachings of Jesus, a restatement in the most strikingly helpful and universally uplifting phraseology. Thought gems and superior concepts are assembled from more than two thousand human beings who have lived since the days of Jesus. Here is a most effective portraiture of Jesus' perfect human life devoted to one great purpose: doing the Father's will, and revealing the truth -- that God is the loving Father of all men and that all men are brothers.

The times are ripe for the proclamation of the ennobling message of Jesus, unencumbered by the accumulated doctrines and dogmas of nineteen centuries of contact with religions of evolutionary origin. The book gives a new revelation of Jesus with a new and enlarged presentation of his saving message which can spiritually unite in loving service the numerous families of his present-day professed followers. What is there, in this world, of greater value than knowledge of the religious life of Jesus and how he lived it?

This book increases an appreciation of the religious wisdom and spiritual truths contained in the Bible and corrects our thinking in many ways. It satisfies the intellect and fully harmonizes modern science, philosophy, and religion. It unifies history, co-ordinates geology, astronomy, physics, chemistry, biology, sociology, and psychology. It will help us solve our increasingly complex modern problems. It refreshes our spirits and gives us all a new understanding of life's purposes, new zest in living, new zeal in serving God and our fellowmen.

"The religious challenge of this age is to those farseeing and forward-looking men and women of spiritual insight who will dare to construct a new and appealing philosophy of living out of the enlarged and exquisitely integrated modern concepts of cosmic truth, universe beauty, and divine goodness."

Do you know all you want to know? Are you languishing in futile yearning? Read this book's inspiring forward look. Dare accept it's challenge. Obey the truth. Go forth bravely, equipped with spiritual weapons, to conquer the world with unfailing forgiveness, matchless goodwill, and abounding love.

Prepared to introduce the Urantia Book to my friends who value the old and seek new truths. Extra copies available. Robert Burton, M.A., B.LL.
