Chicago 40
Labor Day, 1957

Dear Dr. Sprunger,

There are items of information you should have had before this. I did not realize that your study group was even interested in a charter — fast progress, as solid too, I'm sure — an encouragement to all of us.

I'm eager to see that new pamphlet of yours, the "primer" with preparatory preface. When there is an authorized digest of the Urantia Book, perhaps the requirement that all ten founders must have read every one of the 2097 pages can be reduced. The point is that they must sincerely believe in the Revelation. The Urantia Papers would be a jinx plus for certain isms to get control of, and I don't want infiltration by votes to be too easy. That, of course, is for the far future.

Not knowing beforehand just when your church services began, my husband and I were indeed lucky to have heard your entire sermons. Besides being timely, well organized, interesting, recognized Urantia phrases, and the referred to Dr. Sadler's sermon, and the whole service were primarily worshipful. And afterwards that ham tasted even better than it smelled. I'm sure it influenced my husband to calm down his hurry to go on to Monticello! We got there in plenty of time, laden with interesting books, well fed in body, mind, and spirit, and most grateful to you and your fine family for a memorable day.

Sincerely, Ruth Bur

P.S. I'd send a copy of the consolidation of Urantia Society of Glenview in about a week.
