

November 23, 1963

Dr. Meredith J. Sprunger  
4109 Plaza Drive  
Fort Wayne, Indiana

Dear Meredith:

Perhaps you have heard from Florine or seen in the papers that Bill Sadler died suddenly early Friday afternoon. I do not know all the details, but as I understand it he had an attack of something in his office which sent him into convulsions. He was taken to the hospital and died immediately. The memorial service will be private, strictly by invitation.

Christy and I thought you might like to have the enclosed clipping. We think the picture is quite good. His death was a shock to all of us, though not wholly unexpected. Doctor seems to be holding up quite well.

Sincerely,

Marian Rowley
