Dear Marian:

Thank you for sending Mr. Zachow's article. I cannot follow his thinking. It appears that he has arbitrarily taken some Urantian cosmological concepts and attempts to relate certain data from astrophysics to these concepts. It seems to me that he has very weak logic for "dragging in" his cosmological picture. Am returning the article for your files.

We enjoyed all of the presentations at the Summer Study Session. Vern always does an excellent job and I was particularly impressed with the excellence of Paul's talk. Am enclosing an outline for Julia. Sorry we didn't get time to talk. The way activities are increasing at 533 Diversey, I know you are hard pressed to keep up with everything. But we do appreciate your efficient handling of Brotherhood responsibilities.

Cordially,

Meredith
