Attention: Miss Marian Rawley
Secretary General

Dear Miss Rawley:

I have delayed answering your earlier letter, for I had hopes of gathering some unusual information that would be of considerable ^{interest} to you. However, to this date I have not been able to materialize a program. What I have attempted to do is to take the theme of this essay and present it to the top men of the Companies around the country, who I believed would be interested in pursuing the concept. So far I have seen and had answers from about 50 % of the 21 firms and research organizations I initially contacted. None of the physicists that I have discussed the concept with so far have refuted it or found serious fault, but the concerns are not at the present interested in pursuing such a program. It is costly, as shown by the attached cost estimate, even if only the 3rd subcontract were pursued, but I believe if backed by the proper company then a contract could be obtained from the Office of Naval Research. I am thoroughly enough convinced of this to spend two months of my time, full time, to try to sell the program, much to the dismay of a number of people.

In regard to the Gravity Research Foundation, it is located at New Boston, New Hampshire. The founder is R.W. Babson, present President is G.M. Rideout and secretary is B.M. Pelchat. It is a little known organization that gives yearly prizes for the best essays on Gravity, or any devices related to it. The winners are not announced until June.

Your question on where I got the Urantia Book some what puzzles me, for I ordered it from you last Christmas 1956. I had however, been reading it for many months before that, having borrowed a copy from the Association of Research & Enlightenment in Virginia Beach, Va., from Mr. Cayce. I also met Mrs. Taylor in N.Y.C. several months ago, who told me a little more about your organization.

I am sorry but I can not furnish you with any additional copies of the essay, for I have only a few left, but I will gladly give you permission to reproduce same. I would very much appreciate the opinions expressed by those who have seen it already and would like to correspond with those seriously interested, for I have only scratched the surface. As to my background, the attached resume may help you. Not reflected there is considerable research in cosmology, metaphysics and astrophysics.

May 6, 1957

Now I have several questions for you that I havent had time to inquire about. Could you provide me with a somewhat detail writetup of the facts behind the Urantia Book? Why did you change your name to Brotherhood ? What are the dates of presentation of papers 15, 41, 42, 43, and 57.? Were these papers re-edited celestially as a number of the other papers are reported to have been ? Also, since this book is an unusual publication job, how are you able to cover cost at only \$10 a copy? Do you have records as to the number published to date and how many have been sold? On what basis do most individuals seek out this book, through metaphysical work? Next question then is how much do they benefit from it, for much of the text is written so that considerable thought is required to interpret same. In addition, considerable cross reference is required no matter what subject you may be pursuing. Incidentally, has any one attempted to cross reference this work, or any type of breakdown? Can you provide me with a copy ?

There are two very important questions in my mind still unanswered, though I have read only about half of the book? There is no mention of reincarnation directly, it might hint it, but I feel that mans mind tends to want to read it that way because of his other metaphysical studies. As you know the other only worthwhile basic text is A.J. Davis's "Principles of Nature". In consuming that from cover to cover there isnt a single word on reincarnation !!! What is your interpitation.? Along the same line is the question of Atlantis ! Neither the Urantia Book or Davis's text confirm its existance, yet all other metaphysical works play it to the hilt ??? Mu and Ur and all other pre-civilizations are covered, but no Atlantis !

I hope I have answered your questions and will be glad to be of assistance wherever I can. I may be in the Chicago area shortly and will look you up for a rather comprehensive chat, but if any of your present organization are in Philadelphia I would enjoy chatting with them. I hope to hear from you at your earliest convenience.

Sincerely yours,

A. A. Zachow
A.A. Zachow

BUSINESS RESUME
of
ARNOLD A. ZACHOW

Employment record:

November 1956
to present
Mgr. Special Projects Div. Facilities Dept.; Wright
Aero Div. Curtiss Wright Corp. Responsible for selection
and design of all data acquisition and data recording
equipment for Wood Ridge and Quehanna. Responsible for the
design of facilities for removal of Boron Oxide and other
special fuels; Preparation of proposals & appendices for
special facilities. Made cost reduction & cost avoidance
of \$1,200,000 in five months.

January 1956 to
November 1956
Management Consultant - Self-employed. Did work for small
instrumentation firms with capital assets of less than
\$1,000,000, covering operation surveys and new product
evaluation and promotion. Also, part time executive and
technical recruiting.
