Dear Dr. Sadler and Christy:

Have read Long Heads and Round Heads and find it quite interesting. Just as a medical student examines himself for the symptoms of all of the diseases he studies, I found myself wondering how much of the Alpine and Nordic heritage my Swiss ancestors had! I felt a little better for having blue eyes!

Seriously, I hadn't realized the German writers were so brazenly Machiavellian. What amazes me is that you could dictate this entire book in twenty-four hours! Especially appreciated getting the twenty-five points "in the flesh" for it certainly helped us to understand why you have been a speaker par excellence.

Also I am glad that you are skeptical of parapsychology and psychic phenomena for as leader of the beginnings of the Urantia movement, no one can ever rightfully accuse you of being gullible or soft-headed regarding such phenomena.

We should like to thank you folks again for the enjoyable visit we had Sunday and hope that you may be able to visit us this Fall.

Sincerely yours,

Meredith

P.S. Just happened to remember that you were going to talk about reactions to the Urantia Book next Sunday. Since I received an interesting letter this week from a young physicist whom I know - a Unitarian, I thought you might like to have it. He obviously hadn't read the book and probably lost the letter in which I asked his opinion as a scientist on Paper 42, my primary reason for sending the book. Would appreciate having the letter to keep on file.
