

NORTHEAST REGIONAL MEETING
November 4, 1978
Discussion Group Questions

1. What is the relationship of God the Supreme to the Master Universe, and what is the relationship of evolving mortals to God the Supreme?
2. Is the structure of the Master Universe or the sequence of its development in any way similar to aspects of our present or future life experience?

What value does an understanding of the structure and/or function of the Master Universe have in living daily life, in promoting a consciousness of the Fatherhood of God and the brotherhood of man?

3. Consider the following quote from The URANTIA Book: Upon the coming into existence of the Supreme,

"...the Father-I AM has achieved relatively complete liberation from the limitations inherent in infinity of status, eternity of being, and absoluteness of nature." 1266-3

How can this somewhat incredible statement be explained?

What purpose does the Grand, and subsequently, Master Universe play in this dynamic?

Is there a parallel or concomitant to this dynamic in human evolutionary experience?

What does our participation in a process which releases the Father from infinity limitations mean to each of us?

4. Consider the following quotes from The URANTIA Book:

"The entire scheme of universal creation and evolution on all experiencing levels is apparently a matter of the conversion of potentialities into actualities; and this transmutation has to do equally with the realms of space potency, mind potency, and spirit potency." 1261-3

"The final dynamics of the cosmos have to do with the continual transfer of reality from potentiality to actuality." 1263-4

What is the possible difference in the experience of this dynamic in the Grand Universe versus the balance of the Master Universe?

Consider the possibility that in the finite realms reality can only be experienced as an actuality, and that in the outer space levels reality can be experienced directly as a potentiality.

What does this all mean to us in our lives here on Urantia? Do we ever experience potentials directly as real? Do we ever transcend time, or space?
