

FINAL DYNAMICS OF THE COSMOS

From the Urantia Book

"Man's terrestrial orientation, his cosmic insight, and his spiritual directionization are all enhanced by a better comprehension of universe realities...." 1162:1

PERIPHERY OF INFINITY

"Actuality exists centermost and expands therefrom into peripheral infinity; potentiality comes inward from the infinity periphery and converges at the center of all things. Originality is that which first causes, and then balances the dual motions of the cycle of reality metamorphosis -- from potentials to actuals -- and the potentializing of existing actuals." 1262:9

"The final dynamics of the cosmos have to do with the continual transfer of reality -- from potentiality to actuality. In theory there may be an end to this metamorphosis, but in fact, such is impossible since the Potential and the Actual are both encircuited in the Original (the I AM) and this identification makes it impossible to place a limit on the developmental progression in the universe." 1263:4

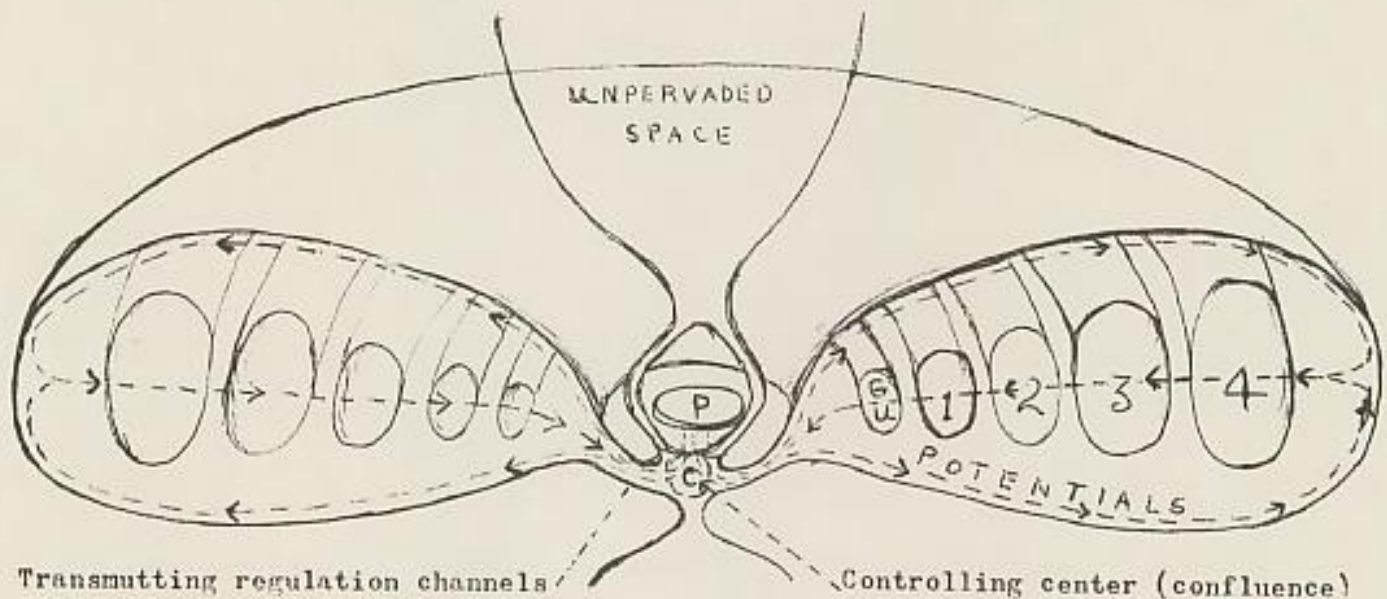

Nether Paradise: "Occupying the outer margins of the under surface is a region having mainly to do with space potency and force energy." ... "This center consists of three concentric elliptical zones: The innermost is the focal point of the force-energy activities of Paradise itself; the outermost may possibly be identified with the functions of the Unqualified Absolute . . ." 122:#5:4

"The inner zone of this force center seems to act as a gigantic heart whose pulsations direct currents to the outermost borders of physical space. It directs and modifies force-energies but hardly drives them. The reality pressure presence of this primal force is definitely greater at the north end of the Paradise center than in the southern regions. . ." "The mother force of space seems to flow in at the south end and out at the north through the operation of some unknown circulatory system which is concerned with the diffusion of this basic form of force-energy." 122:#5:5

"All forms of force and all phases of energy seem to be encircuited. They circulate throughout the universes and return by definite routes. But with the emanations of the activated zone of the Unqualified Absolute there appears to be either an outgoing or incoming -- never both simultaneously." (The two billion year space respiration cycle.) 123:2

Following are references regarding the nature of the Unqualified Absolute: 6:2: "... the static infinity of the Unqualified Absolute; 637:LP: "The Unqualified Absolute upholds the physical universe..." 1155:3: "The Infinite Capacity. I AM static-reactive. This phase of the IAM is perhaps best conceived as the super-gravity presence of the Unqualified Absolute." 1156:5: "Static, reactive, and abeyant; the unrevealed cosmic infinity of the I AM."

Below is a cross section of infinity illustrating a concept of the "dual motions of the cycle of reality metamorphosis" -- potentials to actuals, -- actuals to potentials -- and the return to Paradise --, through transmitting regulation channels. (See 123:#6:2)

"All force-energy proceeded from Nether Paradise and will eventually return thereto following the completion of its space circuit." ".... space is the womb of several forms of matter and pre matter." 123:3
