Dear Friend:

Yesterday I received your most kind note dated February 2, and am indeed greatly impressed by your most wonderful analysis of the Urantia Book. In fact, I am afraid this represents for you the loss of much needed rest. Thus I am particularly disappointed to note by your general letter of the 6th that it seems it is not permissible to broadcast this analysis on account of copyright laws. It just seems to me that the laws nowadays are constantly causing embarrassment and annoyance.

Last night I read about half of this matter you have written, and will finish it over the week end, and then will return the matter to you. You certainly have done a magnificent job, and at least placed yourself in such position that you have a more definite knowledge of the Urantia Book than, I believe, anyone else, unless it would be the Sadlers. They have read the proofs and studied the subject matter so much that they are indeed most familiar with it.

With kindest regards, I remain

Sincerely yours,

W. F. Harrah
