April 29, 1957

Dear Dr. Sprunger,

Just a few minutes before the day's work begins to tell you that you might have been out of sight yesterday, but hardly out of mind. I spent about 15 minutes telling about your work and methods, and everyone was very interested. I want to thank you for the questionnaire and study group material. I had the questionnaire mutilated and it created a great deal of interest. The women also reported on your Easter program and they were delighted with your home and hospitality.

We celebrated the remembrance supper yesterday for the first time; it was simple but impressive.

A letter was read from Pearl Buck in which she ridiculed the Book unmercifully. I think she only scanned it. I think author ego got in the way and somehow I got the impression that she has a personal religion of her own that she pretty much accepts as an absolute for herself and probably every one else. Her letter was a shabby performance-- for a respected authoress.

I could not quite understand your comments about Dr. Zachow and what he has done. Perhaps I should have used the work cosmography, although cosmology is the more inclusive word and covers the structure of the universe. I really think in the not too far distant future astronomers will be proving the setup of the universe as given in the Urantia Book. It just never occurred to me that laws of gravity would be instrumental in proving it so conclusively as Dr. Zachow seems to have. I think he is a very gifted, but young physicist. We are trying to find out more about him.

We hope to see you in Chicago some Sunday soon.

Sincerely,

Harold Karr
