Mr. Arnold A. Zachow
531 E. Manova Rd.
Havertown, Pa.

Dear Mr. Zachow:

For some time I have been wanting to write you to express my appreciation for your paper, Gravitational Energy and Its Inter-Relationship To the Science of Cosmology. Dr. William S. Sadler of the Urantia Society of Chicago showed your paper to me. My background is in the fields of philosophy, theology, and psychology. From these points of view the Urantia Book is superb. The cosmology of the Urantia Book I assumed was beyond empirical validation and so was quite amazed to learn of your paper.

This winter I plan to write a book using the insights of the Urantia Book that are reasonably clear from a evolutionary or empiricist point of view. One chapter will deal with the fact that our present religious thinking is based on an antiquated cosmology. To get background for this chapter I have such books as The New Astronomy published by the Scientific American. I am wondering if I could have a copy of your paper for this purpose also. If you will send me a copy or tell me where I can get one, I shall be happy to return it to you.

Sincerely yours,

Meredith J. Sprunger
