Dear Dr. Sprunger:

Thanks so much for the sheets telling me more of the origin of the Urantia Book material and for offering to let me have the loan copy for \$10 - for which I enclose my check with thanks.

I shall hold up the proposed review until later, as you suggest. I am sure your history will be of great value in many ways to the student.

I am always interested in the material that comes through sensitives and cannot help but wonder why, when Huna was so old and was the most highly developed psycho-religious system of all, and when we find it so clearly behind the secret teachings of Jesus as well as hidden in the early writing of Yoga, it should have entirely escaped the notice of the entities who gave Ohaspe to Dr. Newbrough, the Book of Mormon to Joseph Smith, and now the Urantia Book. (Not to mention the many other writings from similar sources, some of which are supposed to be written by Jesus himself.) I am wondering if the same sensitive is still getting material of this sort through and if it might be possible to ask through her/him or the circle, for information as to the overlooking of Huna. Of course, I realize that the Huna system of three selves, three potentials of vital force and three tenucus bodies does not at all match the system given in Urantia to fill this hole in human knowledge. I have tried several times to pass on the knowledge of Huna, as I now see it, to spirits communicating from the other side of things, but with no luck. They all seem to be entirely set in their ideas and unable to tolerate anything contradictory. My guess is that the average communicator is lacking mana enough to do fresh thinking and as must do with what he did on earth or accept memories from other spirits without thinking them through.

I trust you will have a grand vacation up at the cabin in the north woods. I know how lovely it up there.

Again my warm thanks, and now my aloha,

Max Freedom Long
