

Mar. 9/82.

Dear John,

I'm much longer getting this note off to you than I had originally intended. However, there has been much to think through & though my enthusiasm for your school has certainly not lessened, the possibility of our taking part in it has. Adjustments are necessary every day, to the changing economic times, and with my husband's diversified business involvements, we are being challenged on all fronts. But all of that uncertainty contributes to the exciting times that we're lucky to be living in, (especially if you have a Thantia Book!). And what has resulted it appears, is a renewed interest in more intensive study of the Thantia Book in our own area. We are starting a 10 week session (2 nights a week) the end of this month with more preparation & involvement on the part of everyone. Tampa, St. Pete, Clearwater & Sarasota groups are now going to meet quarterly for a mini-conference where a leader prepares a topic

and members of the group assist in the presentation. It will allow for a broader ~~some~~ type of participation where most of us will learn by doing. Most people seem enthusiastic about these developments and I'm sure they'll provide a real stimulus for increased study.

Both Sherer and I wish you wonderful success with the school - we wish we could be there - it is a thrilling undertaking for the advancement of serious study of the Wrenken Book and really a fantastic service to others.

God bless your endeavours!

Sincerely,

Sue Tennant.
