Culver City, California 92715

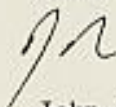

Dear Julia,

As per our conversations in the past, we would like to receive your mailing list of URANTIA Book readers and study groups. At the present time, we have four, computerized mailing lists: one for society members, one for the region, one for contributors to the Planetary Prints newsletter not in the region, and a national/international list. Taken together, this is more than 800 names. We have just today sent out a mailing to the regional list (a copy of which is enclosed), and we will be doing another mailing toward the end of the year.

Beginning September 20th, we will have two classes made up of some twenty students from around the country. Things are going well, and we sincerely look forward to the time when you may visit us at the School.

Thank you very much, Julia, for your consideration. Do kindly convey our best wishes to everyone at FUSLA.

Peace & Blessings,

  
John D. Hay
