Dear Steve,

In my presentation on the first evening, I will speak on "Emerging Theories of Reality". This will involve a consideration of some new insights concerning physical and spiritual reality that challenge currently accepted concepts. Examining these new theories in the light of related information in The URANTIA Book may be a useful and enlightening experience.

On the second occasion, I will talk about "Universal Wholeness", a consideration of the inter-relatedness of all beings and all things and the growing recognition of such an holistic principle. Here, too, the advanced thought of our present time is becoming aligned with that which is presented in The URANTIA Book.

Please let me know at your earliest convenience whether you feel there is interest in an evening presentation-discussion on the work of Bob Dylan. To me this is an important topic that I am willing to share my thoughts on; but I was unsure from our recent conversation as to whether there would be an audience for it there.

Peace and Love,

Bob Hunt
