Dear Jim -

Still flying high on the energy from that fantastic gathering you people put together in L.A. It was the inspiration for this gathering - a more informal, certainly unofficial meeting of some locals here and any others who might be interested. I'm not sure if this kind of thing would be appropriate for the next Agondonte, or even if the timing would be right. However, this conference might produce some useful material for future issues.

We've sent flyers to selected individuals, i.e. Jeff, Scott, Julia, Drs. Hunt & Calabrese, Jim E., Michael Hill, Chick M., Dick Prince, Dan Kemp - but you could be of help if you could pass the word to others you know would be really interested. There is a lot of talent up here of first class status waiting to be "discovered."

I'm trying to work as a funnel for material for you & will be going over some things I've collected over the last few years for the best pieces. Right now I want to get this mailing out & then I'll have some more time. Keep up that high level of humor - it's so important & keeps the subtle heaviness away, which leads to fear & despair, so paralyzing.

We seem to be entering a new era in the U.S. "movement." What a fantastic challenge.

Joy, love, peace,
Larry B.
