Dear folks,

Can't tell you how much I get out of your newsletter. Haven't talked with more than a handful of Urantians since the Summer Study Session, & hearing of all your activities, & seeing what you're putting together out on the west coast is heartening indeed.

I would like to get hold of a couple copies of Bob Hurt's address to the World Future Society. I'm only going thru my second reading now, but it seems that the "intellectual approach" is the "method" I'm most at home with so far. Enclosed is some bread for the speech & your postal fund.

Please note my new address:

Although I would like to think of myself as a "scholar," I must confess your "scholar's quiz" keeps me well aware of my ignorance. In this line (& in line with my current employment), would you be interested in any Urantia crossword puzzles? Let me know & I'll be happy to make up as many as you want.

Thanks again for your "encouragement from afar."

A fellow Agondonter,

Leo Quinn
