

Study gorup

- Jim McNe~~ly~~<sup>ly</sup>

A study group that meets regularly that was lot listed in last issue's calendar is in the San Fernando Valley at Polly Parke Friedman's house. It meets the third Saturday of each month with the members eager to increase the size of their group in order to meet more often. Polly says that they follow a format very similar to the one described by Bob Hunt in a previous issue of the "Agondonter."
