

7
The primary lesson of evolution is survival. We seek survival on the physical level through the intake of oxygen, the assimilation of food and water, the recharge activity of sleep, the perpetuation of the species through sexual reproduction. We serve on the intellectual level through an open attitude of receptivity, the transfer of the mental consciousness to the material consciousness serving physical life and through assent to the worship of God through the gift of our free will by consent to the will of God as revealed in the Son. Spiritual survival occurs through personal unification of the creature with the creator, the Son with the Father.

As we seek to serve our fellow man, we must now seek unity and co-operation to facilitate survival through the expansion of service groups to maintain civilization.

Fusla Members on the Move

The membership of First Urantia Society of L.A. contains many talented and dedicated individuals from all walks of life. Beverly J. Wold from Hemet California, is a photographer and the Agonywriter has just discovered that she is one of 50 photographers from the U.S.A. who ~~is~~ ~~are~~ is going to participate in the first photographic cultural exchange with the Soviet Union. Beverly will be spending time in Moscow, Leningrad, Kiev, and Sochi between June 26 and July 10, 1974. We hope to get a first hand report from her as soon as she returns. Congratulations, Beverly!

Another Fusla member on the move is Fred Shupp, co-founder of the Urantia lending library. Fred has just moved from Orange County to Berkeley Calif to work with Vern Grimsly & the Family of God Foundation. Fred works for a large supermarket chain in the Bay area and volunteers his time helping the ~~busy~~ Vern's busy group. ~~Both~~ Three other Fusla members, Jo Ann Eishman, Mary Strahan and Terry McCade have also ^{previously} moved to Berkeley to work with the Family of God Foundation. While we hope

only the best for our FUSLA Brothers & sisters
in Berkeley, we hope the trend slows down a
bit in future, or we'll ~~lose~~ eventually lose our
entire membership to Vern. Best of luck and
all our prayers, from FUSLA.

A fragmented, edited and deranged Mantia book
could never help man grasp the true sense of the
Father's primary as the fulcrum of all action. It would
be a shame to have to present an accounting of
our copyright stewardship by saying that we gave the
leading away and lost it with little return. Just
or had would be to buy the book and return it
to our master unchanged and unopened. How beautiful
it would be, if when our master return, we can
show forth the original and complete text and ~~still~~
~~produce~~ ~~healthy~~ ~~service~~ here evolved a group of
transformed new age leaders ready to embark on
the unified reconstruction of our troubled planet.

Must we sacrifice the unity of the future for
a project of dubious merit in the present? What crime
is it to cultivate our evolutionary progress for a little
while longer while ~~we~~ we wait upon our Father's
hour to arrive? Let us focus on patience and accept
in faith the methodology of the Mantia Foundation's
protection of the copyright and trademark in compliance
with the laws of the land.

Each Mantian should take the matter seriously and
recognize the importance of protecting the text while living the teachings.
Adam and Eve saw little harm in their shortsighted but curious
adventures a great revelation. The Mantia book will not
survive on its own, but on the lips of the fervent reader and
dedicated worker whose vigilance and unity in faith becomes will
be a service for all future generations and even to the Supreme
himself.

of evolutionism were such that the work of the more spiritual individual of strength through friendship may be greatly hampered.

In the not too distant past, Europeans were seen burning books by the thousands because they believed they were a threat to the continuance of their civilization. In other parts of the world and even in our own country, history can be altered, facts deleted and information de-emphasized making modern concepts of deity ~~being~~ conform and even frightening.

There is no need to "Mantiaze" the planet, but there is need to spiritualize it. The only real concern of the Mantia group as regards the material of the Mantia Book should be to assure its continued availability to those who ask for it, the maintenance of a master text from printer to printer and the work of making sure that the word "Mantia" is not exploited by self serving groups and individuals who are more pre-occupied with the teaching of themselves than with the teaching of Jesus.

A Divine Counselor, when discussing the Trinity Teacher now on page 214, stresses the importance of approaching cosmic philosophy from the infinite perspective to the finite view point as a whole and as a continuing unbroken or virgin history and destiny.

~~The not too distant past~~

~~Many~~ person who read the Mantia book have
come from orthodox church.

~~One of the immediate~~

While the Mantia Book tends to attract ^{persons} ~~individuals~~
~~who~~ ^{who} are free-thinkers ~~or~~ individuals ^{having} ~~who~~ ^{have}
attained the level of comprehension rendering ecclesiastical
authority unnecessary, a great many active Mantian maintain
direct relationships with numerous churches and organizations
ever seeking to plant spiritual seeds of ~~so~~ living ~~truth~~
truth in the lives of the evolutionary congregants.

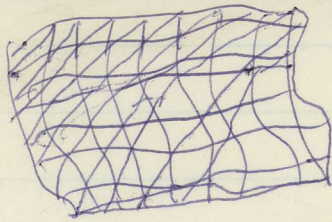

Thus will the growth of our official Mantian
brotherhood keep in touch with the religion of time
until that future generation when there will be one
God being worshiped and one brotherhood being experienced.

The Mantia Book, ~~an~~ an aggregate of wood pulp, ink
stain and cloth weighs three pounds, will definitely play
an important role in preparing progressive individuals for
their more ideal order of planetary affairs, but more
importantly, their enlightened social structure will be manifested
by the acts of spiritual enquired individuals who place
supreme importance on the divine plan of evolutionary
experience as the concomitant of revelation.

It can be understood that men do not need
the Martin book in their library immediately in order
for the brotherhood of man to be realized. Men need
the ~~lesson~~ of the enlightenment of daily religion living
along the Jesus pattern with the truth deriving insights
of the Holy Spirit. We owe the ~~the~~ teachings of Jesus
as presented in the Martin book to every future generation
not just the time in which we choose to be alive.

There are risks for the future in an ever-rapid spread
of the Martin teachings, especially if such unwise and
innovative actions are openly associated with law-breaking
or divorces ~~with~~ ^{from} the foundation of true friendship.
~~If the cult of behavior were not bound but only~~
Our organization of United Martinists must exist as an expression
of our love for each other in order to serve our fellow
man. Man's liberty of the future must be ensured by
sharing with tomorrow the investment of today compounded
by the interest of ~~the~~ the sum total of our combined
experience.

Men should we have ~~relationships~~ ^{activities or debates} which are entirely
closed-group serving or spiritually stagnating. The natural
evolutionary experience is sacred and we have no right
to assert the arrogance of revelation in order to chase
the sensuality. Revelation is a free-will gift that
must be asked for. All of us have experienced the
impossibility of proving the validity of the Martin books
to an antagonistic ear. To barter the world with
unshared truth and information will numb the senses

to evolve assertion of presence and
 study group transcending into the
 states of spontaneous joy found only in
 group adoration and worship of our
 Universal creator.

We have seven centers of energy
 at our combined disposal, the spirits of
 intuition, knowledge, understanding, counsel,
 courage, worship and wisdom. ~~to~~ These
 spirits are the ~~the~~ available for our
 use, even to link our circuit through
 mutual agreement in order to establish
 a stronger and more durable foundation
 of a sunny structure which in its ~~specific~~
~~growth~~ growth of the whole being
 exceeds greatly than the sum of the
 parts, we approach infinity.

~~We~~ There is an urgent need to
 demonstrate living ^{proof} ~~fact~~ of faith born
 from a co-operative effort based on

Love and intellectual service.

The agondater offers its communication networks for service oriented individuals in order to unity the isolated strands of living ministry. We ~~do~~ need to unity our common knowledge, share our common insight, grow in our expanded understandings, offer the counsel and advice of experience and our talents to courageously lead this world of the cross into the ultimate era of light and life.

Service is not something we will do later by our selves, but we are called to exist in the fully service of the United Methodist of America to the destiny of one world, one people, one family, one God, one brotherhood and one life.

We, a small group of Quarterly Book readers, are considering a service project

from of our faith insisted that need
the united talents of our planetary brother.

We seek ~~knowledge of~~ ~~the~~ detailed
and specific information on the processes
involved with the providing of food,
gardens, methane energy, wind energy,
solar energy to insure the survival of
our energy, apostolic core of spiritual
reform religion.

While we grow in love in our
daily life unity our father's love, we
need to immerse our being into the planetary
force in co-operation with the superhuman
intelligence to ^{reach man} end pollution, stop starvation,
provide energy, to generate ~~an~~ ~~impulse~~
nucleus of love dominated service oriented
community of the faith face of God.

This is not ~~an~~ an attempt to
involve the Brotherhood into business, but
to unity our combined knowledge and

into a fellowship of co-operation in
 an arena of group activity yields
 a sense of the essential importance
 of teamwork.

If you are involved with every
 system be they of life, power, light,
 service, heat, purification or organization
 system contact us through the concordate
 in our belief that we are planting seeds
 of ^{faith} ~~certainty~~ which will yield ultimate
 return for the good of mankind, with
 the intention of providing both material
 assurance and spiritual inspiration for all
 generations both now and in the future.
