Dear Chick and Ellen,

I thank you very much for myself and for many others for sending the wonderful maps of the master universe. Kevin Goodman did get a copy, and so did several other devoted students for whom the map will be a great blessing and aid in the attempt to visualize the cosmos.

Two copies went to new students who were very glad to have the enormous task of visualizing the concepts of the prose of the Book already attacked by your artistry in preparing the map-picture.

As a grateful recipient, let me also say that, as in your area, we are devoting energy to expanding our numbers and to developing improving techniques to assist readers in becoming acquainted with and in comprehending the teachings. Thus, as in your area, and in all areas of growth, there will continue to be an expanding demand for all such very helpful tools to truth-comprehension. Thus, I would suggest that you do consider the possibility of producing future copies or editions of the map for these increasing numbers of students. I would not hesitate to suggest that you should charge for this service, just as the Agondonter budgets itself.

Many thanks again and blessings in all you undertake in the service of the divine kingdom.

Love,

David
